

Declaration of Conformity RoHS

We, EATON Power Quality
110, rue Blaise Pascal
38330 Montbonnot Saint Martin
France

declare that product family,

Eaton Protection Station

is compliant with the Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS). The components in subassemblies used in Uninterruptible Power Supplies do not exceed the maximum concentrations of 0.1 by weight in homogenous material for Hexavalent Chromium, Mercury, Polybromated Biphenyls (PBB), Polybromated Diphenylethers (PBDE) and 0.01% for Cadmium.

Materials

Materials are not intentionally added and are below the limits set forth by the EU RoHS directive

Pb	Lead	(1)
Hg	Mercury	None
Cr ₆	Hexavalent Chromium	None
PBB	Polybromated Biphenyls	None
PBDE	Polybromated Dipenylethers	None
Cd	Cadmium	(2)

(1) PCBA components may exceed limits, per the EU RoHS directive Annex items 5, 6.

(2) Circuit breakers may take advantage of the encapsulated cadmium exemption per Annex 8

This declaration is based on the Original Component Manufacturer RoHS compliant documentation and declarations. Eaton Power Quality offers RoHS Compliant product only after sufficient evidence has been received from the component or product manufacturer. Eaton Power Quality makes no guarantee or accepts any liability for the accuracy of the original component manufacture's declaration.
